THE STRENGTH BEHIND THE SEAL

Adhesive Solutions for Wine Capsule Applications

DEKALIN

a brand of DINOL

ENGINEERED FOR EXCELLENCE

DEKAPREN AND DEKAMELT ADHESIVE SYSTEMS ARE DEVELOPED SPECIFICALLY TO MEET THE DEMANDING REQUIREMENTS OF LUXURY WINE PACKAGING.

MORE THAN

70

YEARS

TWO BRANDS, ONE HOUSE

For more than seven decades, we have set the standard in corrosion protection—driven by passion, precision, and an unwavering commitment to staying one step ahead. What began with our first corrosion protection product has evolved into a globally leading system offering under the brands DINITROL and DEKALIN, covering protection, bonding, and adhesion technology.

Where Expertise Becomes Excellence

We continuously optimize our products – practical, customer-oriented, and with a clear focus on sustainability and environmental compatibility. Whether in workshops, industrial settings, vehicle construction, or the caravanning sector—wherever durability, protection, and reliable application are essential, we feel right at home. Our strength comes from a powerful blend of long-standing experience, deep technical expertise, and a strong collaborative spirit focused on solutions. We listen, think ahead, and act with a solution-oriented mindset—so you can protect what truly matters to you.

RELIABLE BONDING FOR WINE CAPSULE PRODUCTION

DEKALIN together with, DEKAPREN and DEKAMELT product families, provides adhesive solutions tailored to the requirements of wine capsule production and bottling operations. Wine bottle capsules — whether made of PVC, polylaminate (often PET/PE/aluminum) and other substrates — require precise seam bonding after forming. Because bottling lines operate at high speed, adhesives must deliver immediate adhesion, fast strength build-up, and stable processing behavior.

Because quality is the solution.

LOCALLY GROWN,
GLOBALLY CONNECTED!

PREMIUM SOLUTION

DEKAPREN

SOLVENT-BASED POLYURETHANE ADHESIVES

SOLVENT-BASED ADHESIVES

ENSURE FAST SEAM BONDING AND STRONG STRUCTURAL ADHESION FOR IMMEDIATE PERFORMANCE.
IDEAL FOR APPLICATIONS REQUIRING INSTANT TACK AND EXCEPTIONAL MECHANICAL STRENGTH ON PVC AND POLYLAMINATE SUBSTRATES.

IMMEDIATE BONDING FOR LUXURY APPLICATIONS

Designed for applications requiring immediate adhesion and high mechanical strength, DEKAPREN adhesives perform exceptionally well on PVC and polylaminate substrates.

They ensure precise application and reproducible results in capsule seam bonding — the ideal choice when fast tack and structural bonding performance are critical for premium wine packaging.

Fast Tack

Immediate adhesion for high-speed production lines.

Solvent-Based

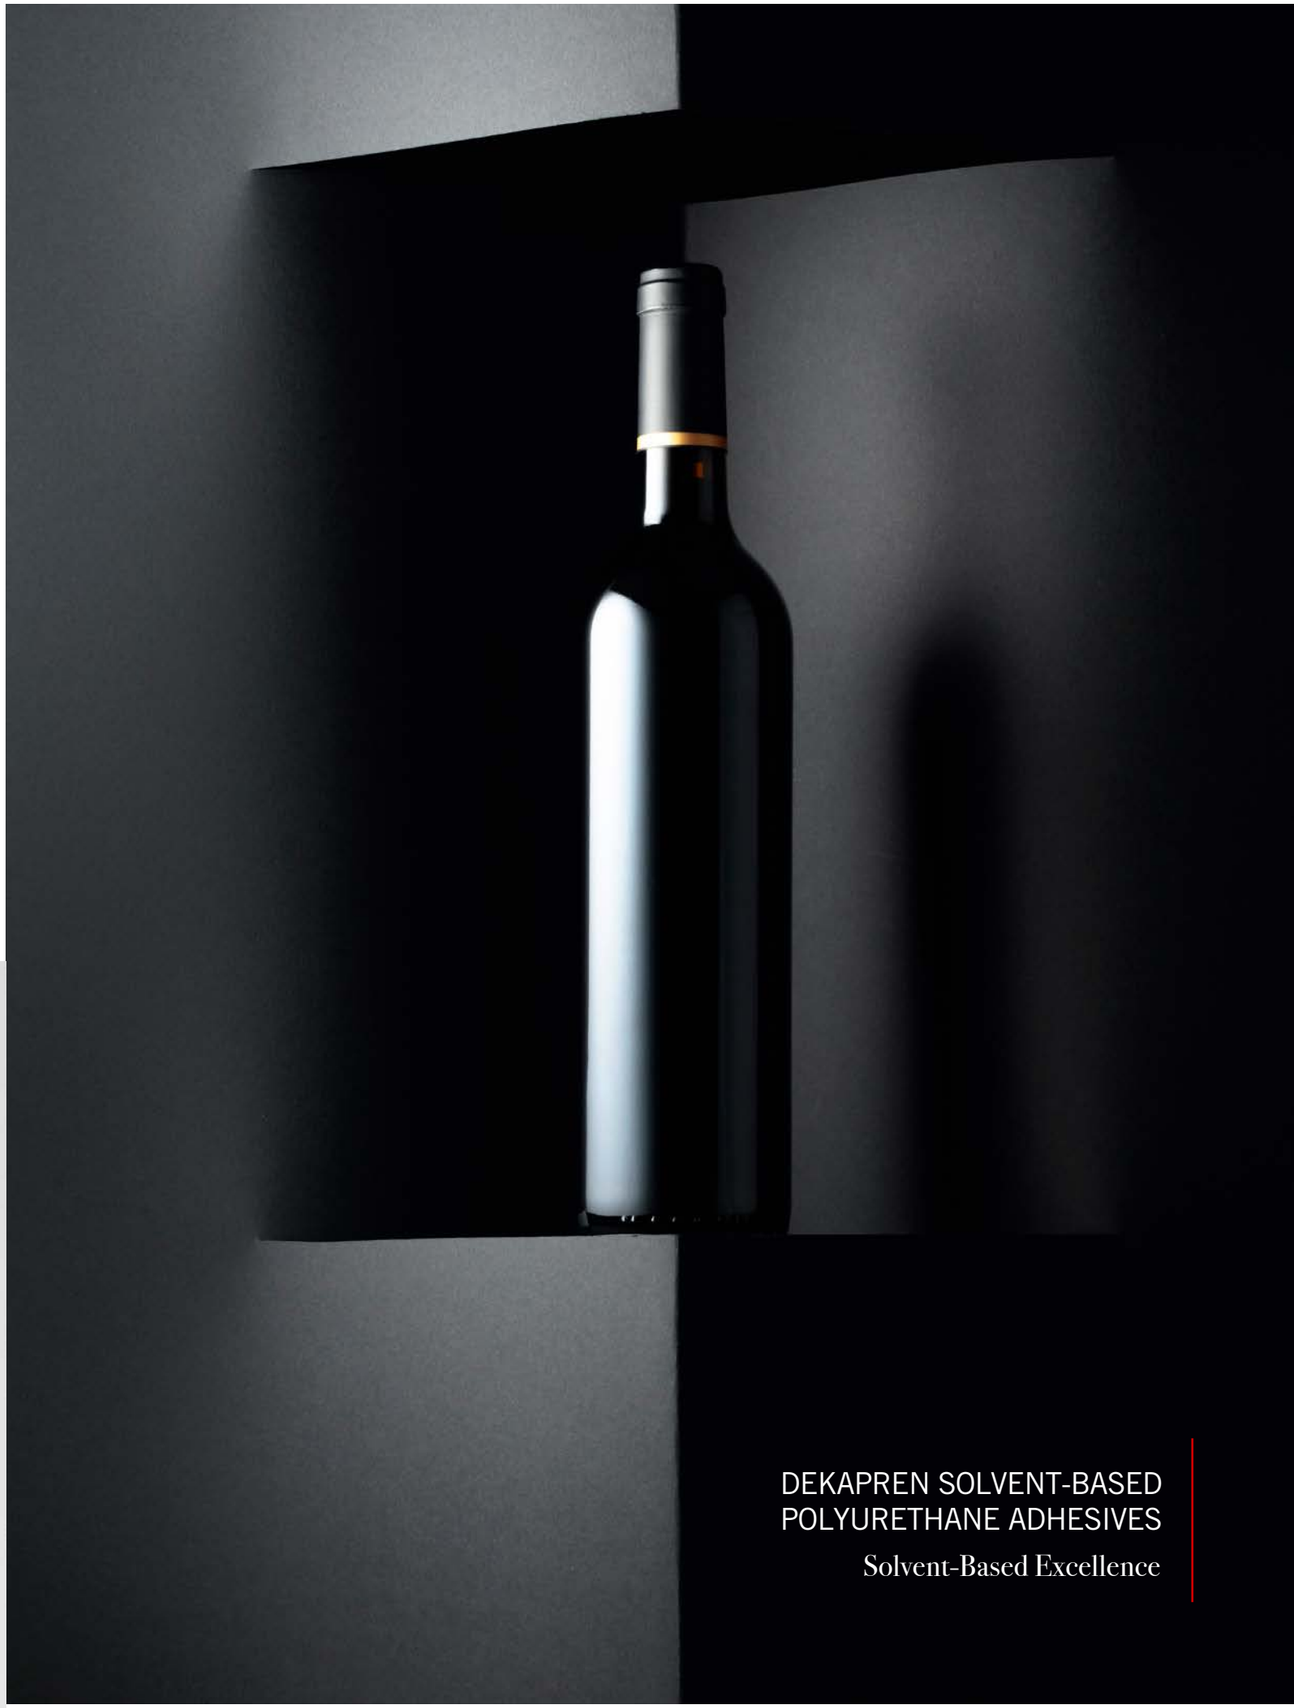

Advanced polyurethane formulation for superior bonding.

High Strength

Exceptional mechanical strength for lasting seals.

Substrate Versatility

Perfect for PVC and polylaminate capsules.

DEKAPREN SOLVENT-BASED POLYURETHANE ADHESIVES

Solvent-Based Excellence

CLEAN TECHNOLOGY

DEKAMELT

THERMOPLASTIC HOT-MELT ADHESIVES

HOT-MELT ADHESIVES

SUPPORT EFFICIENT, HIGH-SPEED PROCESSING AND CONSISTENT APPLICATION QUALITY. PERFECT FOR CLEAN, SOLVENT-FREE OPERATIONS WITH STABLE PROCESSING CONDITIONS ON MODERN BOTTLING LINES.

EFFICIENT PROCESSING FOR MODERN PRODUCTION

As 100% solid systems, DEKAMELT adhesives eliminate solvent handling while ensuring stable processing conditions. They help manufacturers increase productivity, simplify processing, and maintain reliable bonding quality on modern bottling lines.
DEKALIN products complement the portfolio with proven industrial adhesive and sealing technologies.

Efficient Processing

Streamlined application for maximum productivity on high-speed lines.

No Solvent

100% solid systems eliminate solvent handling and environmental concerns.

Clear Bonding

Invisible seams that maintain the premium aesthetic of luxury packaging.

High-Speed Lines

Stable processing conditions for modern bottling operations.

DELIVERING PREMIUM ADHESIVE SOLUTIONS FOR THE WORLD'S FINEST WINES, CHAMPAGNES, AND LUXURY BEVERAGES. TRUST DINOL FOR THE STRENGTH BEHIND EVERY SEAL.
